

Greater Chicago FSDO FAASTeam presents:

Chicago 99s Aviation Expo 2023

Please join us for a day full of education. We have put together a day-long schedule of classes for IFR pilots, VFR pilots, and our best right seat riders, our flying companions. Student pilots at any level are welcome to choose the classes they attend. We will cover an extensive review of IFR procedures, a presentation by National Weather Service Aviation specialist, a medical advocate for fitness and nutrition, ATC Communication for IFR, avoiding hazardous attitudes, a review of aircraft systems by an A&P IA, a runway safety review with surface incident trends, and the next two things about situational awareness. In between your sessions, you will have an opportunity to visit with a wide range of vendors eager to share their time, talents, services, and organizations with you.

Lunch will be available for purchase onsite and there are many restaurants in the area.

Please click on each seminar and register if you would like to attend and receive WINGS credits.
